

Instant-Space™ Growth by Design

Out of thin air

Instant-Space™ lives up to its name. Our mezzanine system fulfills the promise of creating functional space, quickly and easily, where none existed before. It's where all of Cogan's knowledge and experience come together to provide you with a mezzanine system created just for you. Instant-Space™ dramatically changes your space, whether it's storage space outside your building or manufacturing space inside. Instant-Space™ is the best example of how space management has evolved with Cogan.

The choice is yours

From design to delivery, we engineer each mezzanine we sell. We start on paper with a design you approve before proceeding to the next stage of production, for a true "what you see is what you get" preview of the product. All our mezzanines are manufactured on our premises with quality control our first priority. So whether you need us to work with your professionals or use ours for the full Cogan turnkey service, you benefit from our innovation, quality and experience that has kept Cogan on the leading edge since 1901.

Floor space is at a premium when stock is spread out.

Instant-Space™ can almost double existing floor space.

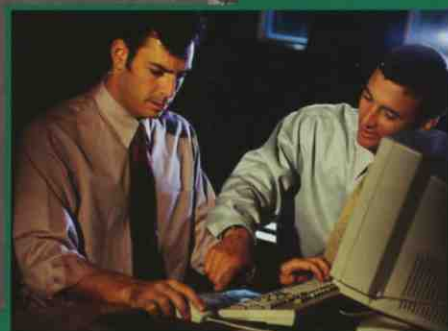

Built according to plan

We marry your needs with our innovative components to create a custom-designed mezzanine that is right for you. Our approval drawings allow you to review every detail of the design, to ensure it meets your layout, load capacity and color requirements. Once the approval drawings are signed, your order goes into production and before you know it, you have a whole new space to work with. From small to large, simple to complex, we have a mezzanine for you.

Cogan

The Evolution of Space

Teamwork has kept Cogan going strong for over a century.

Instant-Space™ works its magic outdoors also. Choose from a multiple selection of sizes, layouts, colors and door options.

You're on solid ground with Instant-Space™
