

ModTech

We Do More

The ModTech system answers your plant office requirements for most industrial and commercial applications. ModTech is an attractive and easy to install method of obtaining the most out of your available work space. It offers supervisory personnel a high visibility of plant operations with a break from plant noise. With ModTech's formulation, staff never need to worry again about not hearing or being heard. They can function in a business environment, free from production noise, dust, dirt, heat, cold or any other unruly distractions.

Clean Room

ModTech's ergonomic design incorporates aesthetic appeal, structural integrity and the human factor to make this the best value for clean room construction. Using Melamine board or steel finishes for the surface allows for impact resistance and easy clean up with a damp cloth. Today's technology, with its high price tag, needs advanced protection. Now, with CPS clean rooms, you can have the best of both worlds. CPS clean rooms are high tech portable structures that can be environmentally controlled to provide a Class 10,000 or better room, which is dust, smoke and contaminant-free.

Two-Storey Facilities

By using space efficiently, the two-storey ModTech facilities are not only effective but also economical. This is a strong, quality built product that will give you maximum space utilization. The system provides in-plant supervisory personnel with an air-conditioned, quiet working environment that has excellent visual access to plant operations.

Contain Protect Shelter

Mezzanine Office

A free standing Mezzanine office is designed to satisfy your needs for additional space while maximizing the use of your available plant area. Now you can have in-plant office space without sacrificing valuable plant floor. With its elevated position, this brightly lit office provides supervisory staff with a good overview of plant operations, while at the same time valuable plant floor space below is used for other storage or manufacturing operations.

CMM Room

This unique ModTèch design has a panelized modular enclosure system that provides total flexibility for future changes, additions and relocation. Wall panels are available in heights up to 16 ft.

SoundStop

SoundStop was developed by CPS to make our Modular plant offices one of the most sound conditioned you can buy. In plants where high noise levels create communication problems, SoundStop is a wise and practical investment. It will pay for itself many times over in
