

Specialized Products

Made To Please

CPS will work with you to customize a portable structure to suit your needs. Virtually any specification or demand can be met in order to ensure that your new addition will be ideal for the application.

Mezzanine

A free standing Mezzanine structure is designed to satisfy the need for additional office space, at the same time maximizing the use of available plant area. Able to be engineered to suit all sizes and types of buildings, as well as loading capacities.

Guard Rails

Guard Rails provide a physical and visual barrier between fork lift trucks and your personnel, products and facilities. Modular in design, the steel rails are easily assembled into a strong barrier to absorb any accidental impact exerted by mobile equipment.

Contain Protect Shelter

Smoking Shelters

Designed to provide an exterior environment that will provide basic protection from wind, rain, sleet and snow. CPS smoking shelters are available with a wide range of adapted user comfort options including: floors, benches, doors and complete electrical systems consisting of lights, heat, ventilation and disconnect panels, while basic shelters are site erected on your prepared surface. All components are vandal resistant, easy to clean and have a long maintenance free life.

Molson Breweries

This custom design control room for Molson Breweries is the control hub of the entire brewhouse operation.

Molson Breweries Custom Millwork

This new Molson control room is fabricated from custom manufactured panelized wall systems to provide a watertight, stainless steel, smoked glass enclosure. Custom built work station counters can be installed to suit your requirements.
