

SOLID TOP MATTING- *The most reliable, hard wearing safety and Anti-Fatigue solution for all wet and slippery areas.*

Safety Step Solid™ HP

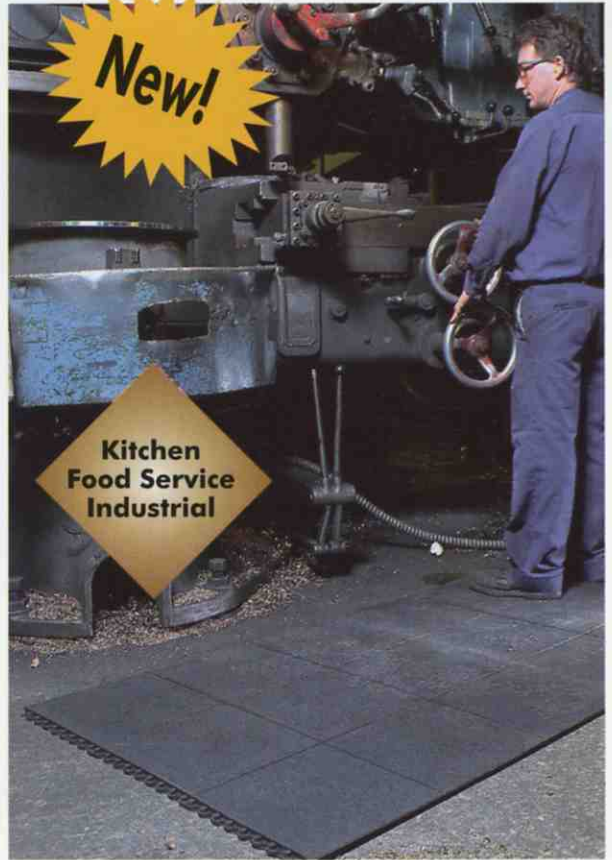

CONSTRUCTION:

- 3/4" vulcanized rubber anti-fatigue specialty mat with a solid surface.
- Top surface grid pattern with raised grip nibs on underside of the mat.
- Overall thickness 3/4".
- Built-in connectors along one side of this mat makes assembly of standard sizes easy.
- Connectors and bevelled edges for non-standard installations are available.
- Colour availability: black

FEATURES AND BENEFITS:

- The raised traction nibs on the underside hold the mat in place and prevent sliding.
- The grid top decreases the possibility of slipping.
- The 3/4" thickness with the raised nib bottom ensures maximum foot and leg comfort, substantially minimizing the effect of body fatigue.

Anti-Fatigue Best	Wear Resistance Best	Slip Resistance Best
Standard Size: 3' x 3'		

Reverse-A-Mat™ New!

CONSTRUCTION:

- 100% nitrile rubber compound.
- Solid, non-porous reversible ribbed or raised nibbed surface.
- Overall thickness 1/4".
- Available with slots.
- Colour availability: black or brick red

FEATURES AND BENEFITS:

- Special nitrile rubber resists oils, grease, acids, alkalis and animal fats.
- The mat's reversible surface ('V' ribbed or nibbed) extends the life and increases the versatility.
- Provides comfortable, slip resistant support.
- Bevelled edges reduce tripping.
- Lightweight construction allows quick, easy cleaning.
