

SHELVING

Space Aid manufactures two styles of boltless medium duty industrial shelving, MAXI SHELF Series 1 and MAXI SHELF Series 2. Renowned for its strength and durability, MAXI SHELF can be used in either retail or industrial environments.

SERIES 1

MAXI SHELF SERIES 1:

Series 1 is designed with just two basic components, pre-assembled all welded end frames and rigid one-piece interlocking horizontal beams. Beams are adjustable on 2" intervals and utilize safety clips to prevent disengaging.

ACCESSORIES:

- Steel Shelves
- Wood Shelves
- Wall Ties
- Row Spacers
- Dividers
- Wire Mesh Decks
- Under Shelf Supports

SERIES 2

MAXI SHELF SERIES 2:

Series 2 is completely collapsible shelving that consists of a number of key components. Individual posts, beams and end supports make this industrial shelving one of a kind. Beams fit into posts on 2" intervals.

See Mezzanines for Shelf Supported Mezzanines

STACKING RACKS

An excellent alternative to pallet racking, stacking racks save space by storing bulk items in individual racks. A safe and economical product, stacking racks are normally constructed from H.S.S. material. Knock-down and collapsible options make empty stacking racks easy to store in only a portion of the space utilized when loaded or by other racking systems. Each rack is designed to meet your specific load requirements by **Space Aid's** Engineering Department.

OPTIONAL FEATURES:

- Slave Carts
- Fork Runners
- Removable Posts
- Cup/Pin Feet
- Collapsible
- Fork Straps
- Stencilling / Labelling
